Extended Medical Insurers
British Columbia

Dear Extended Medical Insurers

Re cost of Dexcom G6

Click on this link (see https://bit.ly/3iAt2mH) for Dexcom G6 pricing straight from the manufacturer - scroll to the bottom of the page for detail.

With a subscription the Dexcom G6 costs $299 per month. Every 3 months 12 sensors + 1 transmitter are shipped. This is the price that clients with a credit card would almost certainly face.

Without a subscription (for those without a credit card) the cost would be that of
A transmitter = $289 which lasts 3+ months = $96.34 per month
A sensor (which last 10 days) hence 3.1/month = $310 per month
For a total of $406/month

Yours sincerely,

Tom Elliott
Medical Director
