Podfiller & Podfiller Plus

Roger Moore, a BCDiabetes client who also happens to be blind who is Looping, invented Podfiller, a nifty device to help him fill his Omnipod pods. He donated the IP to the BCDiabetes Foundation which has had them 3-D printed.

There are two versions of Podfiller:

Podfiller for the average person who has good eyesight and manual dexterity &
Podfiller plus for those with visual impairment, tremor, or manual dexterity challenges.

Both are priced at CAD$59.99 - order from Amazon or Shopify
