2021-Dec-07

One week ago BC Pharmacare announced coverage of [two biosimilar rapid insulins](#), considered by BCDiabetes to be functionally & clinically identical to the original branded insulins, both manufactured by Sanofi. See the link above for the fineprint dates of coverage etc.

insulin lispro "Admelog", available in vials, cartridges & disposable pens

original brand = "Humalog"

insulin aspart "Trurapi", available only in cartridges & disposable pens

original brand = "NovoRapid".

Both Admelog & Trurapi come as U100 only. There will be no U200 Pharmacare-covered rapid.

Admelog & Trurapi are roughly 20% cheaper than Humalog & NovoRapid. Admelog & Trurapi are also cheaper than [insulin regular](#) ("Toronto" =Humulin R & Novolin R). Thus there is no longer a price reason to prescribe [insulin regular](#) over rapid insulin.

Below are the wholesale prices (McKesson) for Admelog & Trurapi (in retail pharmacies such as Costco & Naz's the price will be similar, & higher in other pharmacies) and prices for other insulins from the [PAD 2019 pricelist](#).

Admelog (lispro) 10 ml vial	\$24.00 (2.4 cents per unit)
Humalog (lispro) 10 ml vial	\$30.00 (3.0 cents per unit)
NovoRapid (aspart) 10 ml vial	\$30.00 (3.0 cents per unit)
Humulin R (insulin regular) 10 ml vial	\$25.00 (2.5 cents per unit)
Admelog (lispro) & Trurapi (aspart) 5 cartridges/pens 15 ml	\$48.00 (3.1 cents per unit)
Humalog (lispro) 5 cartridges/pens 15 ml	\$58.00 (3.9 cents per unit)
NovoRapid (aspart) 5 cartridges/pens 15 ml	\$70.00 (4.6 cents per unit)
