Dear (MLA name)

Continuous Glucose Monitoring (CGM) is a life-changing technology that is the standard of care for individuals living with Type 1 diabetes. Because CGM devices are not approved by BC Pharmacare 25,000 British Columbians living with Type 1 diabetes are having to go without.

One of those 25,000 is [a family member] [a friend of mine] [me], - and it is not fair. Access to CGM should not depend on whether or not an individual can afford to pay for CGM or have third party coverage.

[A petition calling for approval of CGM by BC Pharmacare](#) has already been signed by more than 20,000 British Columbians and was read into Hansard by BC's Attorney General David Eby 2020-Jul-23. But that is not enough.

Please advocate on behalf of those 25,000 British Columbians who cannot afford CGM by calling or [emailing](#) Adrian Dix, BC's Minister of Health to expedite BC Pharmacare approval.

Yours sincerely
