Traveling with diabetes

Aviation/Customs Officials Worldwide

Dear Aviation/Customs Official

The carrier of this letter has diabetes, is a client of mine and requires insulin and other injectable therapies and devices to measure sugar/glucose for survival. My client therefore carries the paraphernalia to inject insulin and other agents such as GLP-1 agonist and hormones and devices to measure glucose including the following:

- Insulins (up to three different types)
- GLP-1 (such as semaglutide "Ozempic")
- syringes
- insulin pens
- GLP-1 pens
- insulin pumps & pods
- Insulin pump controllers
- finger-pokers for glucose measurement
- finger poke strips for glucose measurement
- glucose monitors
- continuous glucose monitor (CGM)

Please afford my client every courtesy and feel free to contact me should you have any questions.

Yours sincerely,

Tom Elliott
Medical Director
