Extended Health Insurance Administrators

Re: reimbursement for OrangeLink Pro for insulin pump systems

Dear Extended Health Insurance Administrator

The OrangeLink Pro is a radiofrequency transmitter that is an integral part of [hybrid closed loop \(HCL\) insulin pump systems](#) (see <http://bit.ly/2QO2Xpk>) that use software known as Loop. HCL pump systems using the OrangeLink Pro are typically a small fraction of the cost of retail hybrid closed pump systems such as those from Medtronic or Tandem. Thus if your client is asking for coverage for an OrangeLink Pro they are likely saving you > \$5000.

The Loop HCL pump solution is BCDiabetes' default recommendation for all its Type 1 diabetes clients and its Type 2 diabetes on intensive insulin therapy.

The OrangeLink Pro is purchased [online from its US Manufacturer](#). Current pricing is US\$165.

Do not hesitate to call if you have any questions +1-604-638-0431

Yours sincerely,

Tom Elliott
